Bringing added value to
agriculture and forest sectors
by closing the research and
innovation divide

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 696394.

Helping Multi-actors in the Biomass Value Chain to profit from Innovation Partnership Networks

Foresters & Farmers

(Bio)Industry

Research & Academia

- Becoming active partner in the biomass sidestream value chain
- Gaining knowledge and receiving support in exploiting R&D&I results and exploring business development
- Raising awareness of the potential and opportunities of sidestream biomass applications along the chain of 5 Fs: food, feed, fuel, functional materials/fine chemicals, fertiliser
- Profiting from new business models based on forestry and agriculture biomass sidestreams
- Closing the research and innovation divide through better-directed research and development based on demands identified by practitioners
